HOW TO SUPPORT AND REPAIR THE IMMUNE SYSTEM	7 Pages:
Last Updated: 05-07-18	

For further help in healing and strengthening the immune system (defense system) and clearing the vaccination toxins or any other chemical toxins - please read what we do to help them (below)

HOW TO SUPPORT AND REPAIR THE IMMUNE SYSTEM

Detox from vaccines-other chemical drugs, e.g if you have to give the immune suppressant healing inhibitor type of drug, they won't get better, and so need continual drugs to suppress inflammation, thus leading to many many side effects and liver failure.

What this drug does

Prednisone and prednisolone are medications acts on almost every part of the body and have a wide range of effects including reducing inflammation, suppressing the immune system, inhibiting healing, altering mood, stimulating appetite, increasing the secretion of gastric acid, weakening muscles, thinning the skin, and more. In your pet's liver, prednisone is converted to prednisolone. Pets with severe liver problems are not able to make this conversion effectively, and many veterinarians believe that these pets should only be given prednisolone. Cats also have a limited ability to convert prednisone into prednisolone, so prednisolone is the preferred medication in this species.

Side effects - overuse.

Side Effects of Prednisone and Prednisolone. When pets have to be on prednisone or prednisolone at high doses and/or for long periods of time the risk of significant side effects like the following rises.

- An increased risk of infection
- Altered behavior, including aggression
- Inhibited growth in young pets
- Development or worsening of diabetes
- Cushing's disease
- Vomiting
- Diarrhea
- Ulceration of the digestive tract
- Lethargy
- Delayed healing

A pet that has been on years of prednisolone will need to have his/her immune system treated and repaired from an initially low immune system (allergy reactions) and further damage from overuse of prednisolone drug injections.

This repairing could take many months to heal. Using herbal immune support, colostrum powder or probiotics, and the grass allergy homeopathic drops.

HOW TO SUPPORT AND REPAIR THE IMMUNE SYSTEM - and detox

What to do?

Avoid chemical drugs, products, and vaccines, work on repair damaged immune system. When needed use alternative safe medicines that are chemical free. Thankfully, we do have a choice these days. E.g. vaccine injections or sprays severely deplete your of vitamin C.

What will help?

1. Vitamin C

in diet will help (as vaccines severely deplete vitamin C)

e.g. **a whole food type of "Vitamin C" powder**

(a good one is "[Organic high potency Vitamin C](http://TraditionalFoods.org)" by TraditionalFoods.org (1/4 teaspoon = 1,000mg). This type of natural vitamin c is good if its continued long term just for good health.

POWDER DOSAGE:

Small to Large Canine: Add approx. 1 teaspoon twice a day in meals.

Feline or Toy dog, puppy, kitten: 1/4 teaspoon in meals or milk drinks once to twice daily.

Vitamin C is an anti-inflammatory that helps reduce and prevent inflammation and swelling. Research has shown that high doses of vitamin C given orally or in meals has been shown to reduce the production of pro-inflammatory cytokines. We have had great improvement seen when vitamin C is restored back into the body. Example: vaccinations will severely deplete the body of Vitamin C.

Skin Conditions, weakness in joints and spine which cause "Inflammation" and "pain in joints", spine area can be often associated with a vitamin or mineral deficiencies. Thus continued vaccinations that severely deplete vitamin c and magnesium (stress), will make your dog more susceptible to injuries and tears.

Research has shown that high doses of vitamin C given orally or in meals has been shown to reduce the production of pro-inflammatory cytokines. We have had great improvement seen when vitamin C is restored back into the body.

There are few different types of Vitamin C so for more short-term.

Liposomal vitamin c dosing – for acute illness – respiratory, lung infections, FIP, Parvo etc: or **Sodium Ascorbate Vitamin c** crystals (snake bites, other poisonings)

LIPOSOMAL VITMIN C

PREPARE: using 1 teaspoon (1,000 mg) or cut 1 satchel & squeeze all of the gel into a small dish, add about 10ml water, stir a little, but it won't dissolve at all.

***Toy dog or small animals**

1 dose is approx. 4-5ml (small sip until 5ml is taken, so little squirts usually take about 5 repeats to swallow 5ml without cause stress)

*** Puppy**

1 dose is approx. 2ml-3ml (small sip until 2-3ml is taken, so little squirts usually take about 5 repeats to swallow this amount of liquid without causing stress)

REPEAT A DOSE: 3 x daily from chronic health issues Or if acute respiratory infection for the first two days do at least repeat 6 doses per day. Then upon improvement can reduce to three times a day. FOR HUMANS - cold, flu, pneumonia, bronchitis (take 2 satchels in a shot glass of water or juice - every 10 or 15 minutes - until feeling better for acute infections)

THESE brands of Liposomal C are the ones we highly recommend for pets and animals (and humans)

~ BioCeuticals Liposomal Vitamin C liquid

2. Detoxing Supplement

Using Activated Charcoal powder This powder can detox over 4,000 toxins a day.

PUPPY OR KITTEN give approx: 1/4 teaspoon of the powder to meals or milk drinks.

ADULT PETS: use 1 capsules of the powder or 1/2 a teaspoon in meals and/or milk drinks.

MULTIPLE PETS (cats and dogs), add 2 capsules or 1 teaspoon the powder into a jar with a screw lid (one or 2 cups of filtered water) and can add the homeopathic detox remedies (along with) things like the Bioplasma drops (tissue salts) is great for growing infants and run down pets and kittens who may have had parents who were mal-nutrition or feral etc, homeopathic **ParaExpel wormer** and **Drawing out 16 drops** if teeth or skin issues.

Shake before adding to each meal or/milk drinks. pour about a tablespoon or so of the liquid each time. **TWICE a day for one month** to help detox from the heavy metals from the vaccines.

After a month, one can continue adding activated charcoal to meals daily for optimum health.

* You should be able to order online or buy from a health food store the capsules or powder.

If previously or are on chemical drugs or vaccinations (pet was unwell from) we can "assist in detoxing" as well with the below remedies:

HAMPL Chemical poisoning 110 30ml (overdosing and use of chemical sprays and drugs)

HAMPL Pet Cleanse 30ml (use of any chemical drugs)

HAMPL Drawing Out 16 30ml (draw out any pus/infection, abscess).

HAMPL Vaccine Detox 30ml (all new customers, you will receive a small sample of the Vaccine Detox pills),

HAMPL Rabies Vacc Detox 30ml (rabies injection side effects)

HAMPL Liver Detox 36 30ml drops in conjunction. (all drugs affect the liver)

LIVER

The liver really needs support and clearing at least twice to three times a year no matter what. As all chemicals products, drugs and foods cause side effects, stress, and damages to the liver and second organ affected are the kidneys.

NOTE: Whenever we do a detox, chemical or vaccine detox or liver detox etc. it is always a good idea to help the body eliminate these toxins with the aid of **Activated Charcoal Capsules** (powder from caps) in meals or drinks.

Repeat - am and pm for 1 month. However, can continue once a day for a long healthy life.

HAMPL™ Pet Formulas

Holistic Animal Remedies

We highly recommending purchasing and using the below supplements to restore the good **"gut flora defense system"**

3. PROBIOTIC Powder

~ **"ProBiotic 12 Powder" * 200 Billion CFU's** (brand - Seeking Health) This probiotic can be purchased from Seeking Health website or other websites also sell this. * Mix some ¼ teaspoon of the powder into pets meals or some plain yogurt and offer or oral syringe.

OR

~ **"RAW Probiotics Ultimate Care" Capsules *100 Billion CFU's** (brand- Garden of Life). This probiotic can be purchased from Garden of Life can be purchased at www.iherb.com Open cap and mix (1/4 or a good pinch) of the powder into pets meals or some plain yogurt and offer or oral syringe. They are expensive, but they work the best I have ever tried. I have tried many and they just didn't make a difference. Many of the Probiotics are very weak, these are all strong probiotics. **Pets and the whole family can take these. ** It takes 2 months to fully restore gut flora ** Note:** whether your pet has an infection or not (parasite, bacteria or fungal) or past or present Antibiotic drugs use, your pet needs this foundation of healing in the gut.

and

COLOSTRUM Powder

~ Colostrumhealth 100% pure Colostrum Powder AUD39.00
<http://www.colostrum.gen.nz/> Order online.

OR

~ [New Life Colostrum Plus Immune Formula](http://www.ritecare.com/NewLife_Colostrum_Ori.asp#3) Immune Formula combines the powerful immune supporting benefits of New Life Colostrum with Beta-lipid, olive leaf extract, Larch arabinogalactin, lactoferrin, and Beta 1,3 Glucan. This formula helps support the immune system. http://www.ritecare.com/NewLife_Colostrum_Ori.asp#3.

ALLERGIES

(are due to a weak immune system and gut flora damages)

We have an allergen remedy if needed (just a couple is shown here)

~ **HAMPL Allergen Immune 61 30ml (1oz)**

(allergies from various foods meat, chicken, beef, veal, pork-bacon, all dairy foods dairy products)

~ **HAMPL Grass Allergies 30ml**

(various-grass-pollen-mold-plants) we have more....

example:

[Herbal Immune Support 100ml](#) * for supporting and repairing the immune system

(If you have a small pet, request only 50ml bottle)

and/or [Herbal Antibiotic 50ml](#) * if your pet has also had or currently have infections anywhere in the body.

CANINE DIET Guide

Incorporate less " COOKED OR RAW MEAT MEALS

or

*If feeding COMMERCIAL foods" (better to omit ALL artificial food) and go to "real food" meals.

Two weeks of 50/50 Veg & Meat Ratio with fruit meals separate.

Incorporate mono meals.

Eventually leading to a 3 x week raw meat meals if you can. If not just alternate between fruit meals and veggie & meat meals. In general, we see dogs do better on 25-30% raw meat, 10% meaty raw bone (e.g lamb shank or chicken necks if a small dog), and the rest Veggies and Fruits.

e.g. SMOKED kangaroo, SMOKED lamb necks from fruit and veg markets if you can find someone that does this. Avoid commercially sold type of dried treats. Other: Organic Tumeric powder, Coconut oil, Dates, Raw Carrots, Dried Fruit (no sultanas or raisins) Nuts, Seeds, Squashes, Spinach, Kale, Lightly Steamed Broccoli etc. Pulverise all the veggies for optimal absorption.

Fasting: Fast your pet for 24 hours once a week. You can start with 12 hours and work your way up.
* can give liquids during this time.

Following the 24 hour day fast, do a fruit day. You may add almond milk, organic maple syrup, coconut shreds, raw nuts and seeds in moderation to any fruit smoothies or fruit bowls to get them to eat it.

PLEASE OMIT ALL

Acidic type vegetables (ie tomatoes, oranges etc)

No pork meat

wheat products or foods

Avoid ALL kibble foods

Dried pigs ears or any other toxic processed treats etc.

Vaccination Options - Titre Test

No pet should ever be re-vaccinated, not ever, without a "Titre test" to see if it's actually needed.

What to do?

You will need to phone around to vet clinics to ask if any a vet can order the VacciCheck in-house test kit. Which is basically only AVAILABLE by request through from a Vet Clinic. Give the contact details so they can proceed with purchasing the kit. Then once it is at the clinic they can let you know and make an appointment. *Some vets are not willing to do Titters, so find a more caring Vet to help you make a safe decision on vaccinations.*

Biogal brand - VacciCheck® Antibody Test Kit

USA - www.VacciCheck.com

Australia - Give these details to your Vet - Laboratories Diagnostics NSW.

Contact: Sonia Whittle Tel: 61-2-9668-0600 Website: www.labdiagnostics.com.au

OR Find a supplier in your Country <http://www.biogal.co.il/find-distributors>

If your pet has seroconverted, no matter what their age, they do not need another vaccination. Nor do they need a 'booster' at a year old, as they already have long-lasting immunity.

Dr. Edwards DVM has titre test puppies 2 weeks after initial vaccination if it's positive then they need no more vaccinations (So - any dog or cat, of any age, can be titre tested 2 weeks after any C3 vaccination. If your puppy is going to respond, it will have by then. He has titre tested several puppies after their first vaccination like this, and they've had strongly positive titre levels. Any further vaccinations for these puppies (or kittens) would have been completely unnecessary and may have caused the puppy in question harm.

The whole 'booster' thing is really a false way to describe it - nearly all the so-called 'booster' vaccinations administered to our pets are completely unnecessary. No difference what country you live in, either. There is no need for a so-called 'booster' vaccination a year after the puppy or your kitten's vaccinations.

NO PET SHOULD EVER BE RE - VACCINATED, NOT EVER, WITHOUT A TITRE TEST TO SEE IF IT'S ACTUALLY NEEDED.

Dr. Ronald Schutz's research around the duration of immunity for C3 (Dog) and F3 (Cat) vaccinations has been around for ages - and is only a short google away from anyone.

THE WHOLE BODY needs detoxing, repairing and strengthening, in order for your pet to maintain a strong foundation of defense system to maintain a natural immune system that can stand up against anything that comes there way. Once you go back to putting more toxins in the body - *chemicals drugs, sprays, washes, inhalant sprays in the household, insecticides wormers, flea, and heartworm drugs, this is when your pets life will start going downhill again. .. with chronic or acute illness, skin, joint, organ damages to autoimmune disorder disease.* All these toxins in the commercial foods and drugs and products will shorten your pets life, no different to our own lives.

Please let us know if you have any more questions as we would love to help.
