

HAMPL™ Pet Formulas

# Holistic Animal Remedies

PRODUCT CODE <b>AN082</b>	Healing gut and treating Diarrhea	6 Pages
For all species and ages		
Last Updated: 12.07.18		

## 1. HAMPL Diarrhea 82 30ml (1oz) drops

Homeopathic formula – drops go on body, in food and water dish.

For farm animals or wildlife or feral animals etc can also add a dose to drinking water or trough once a week or when every water is changed for domestic pets. Plus spraying a dose on to food given.

### **PROTECTION for FARM animals against for example:**

**PEDV in Piglets, Pig, Sour** - stir in a dose once a week to water trough as protection.

### **SICK FARM Animals – stress or other factors causing diarrhea**

Put several drops or pills in a large spray bottle of water and bag bottle on table for a minute to activate formula. Then spray anywhere on the body, every 5 to 10 minutes until relaxed and calm, with ease of symptoms.

### **For diarrhea in young animals - Infants - birds all other species**

Coccidiosis is the next likely culprit after worms, so you might want to consider treating coccidia, it should also clear up the diarrhea. Coccidia Dysentery (coccidiosis) scouring (*chickens, foals, kittens, birds, piglets etc*), *rotavirus in young calves*.

Use in conjunction with the "Activated Charcoal" powder or capsules (powder form caps)

## 2. Charcoal (activated) (powder or use powder from capsules)

Natural charcoal for allergies, nausea, ulcers, vomiting, bloat, diarrhea, acid reflux, seizures. Intestinal disorders, Poisons and drug overdoses. **Helps pull out 4,000 toxins a day.**

INSTRUCTIONS. Open 1 capsule of powder (or 1/4 teaspoon of powder) into 1/2 cup of water.

CAT-TOY DOG-SMALL DOG/animal: Add a couple of teaspoons

MED-LARGE DOG/animal: add 3 tablespoons. In every meal 2—3 x daily for 3 days.

Or if not eating oral syringe side of mouth.

Can also use in conjunction - if needed the **Slippery Elm powder** mixture **Colostrum powder** given orally - a oral dose with a syringe every 10 minutes until settled. Repeat casually until 100% well again.

## What can cause diarrhea and other symptoms?

Toxic chemicals causing side effects, ACUTE stress, and many pets that may have a weak **immune function**, which allows yeast infection, allergies and virus activities to occur.

### **Stress can severely deplete a animals immune defense system.**

Common with farm stock or domestic pets who are under stress, stressful environment, trauma of birth, cramped housing, vaccinations severely deplete a animal of Vitamin C. (and vitamin can treat many emergency health conditions) etc

**Symptoms can be** ...abdominal pain, bloating, chest pain, chronic cough, diarrhea, dizziness, dry eyes or mouth and earaches. Irregular heartbeat, jaw pain, morning stiffness, nausea, night sweats, psychological problems, shortness of breath, skin sensations, tingling sensations and weight loss.

**NB.** If acute vomiting is seen also use the non drug prescription (**AN086**) **HAMPL Gastro Acute formula** alternating four to five times daily for a number of days until symptoms are cleared.

### **Due to a weakened immune system bacteria and virus or fungal infections can commonly set in.**

**For example:** a fungal infection internally and/or externally can cause things like....gastritis, sinus infections, respiratory issues, coughing, lethargy, CFS ( as it attacks the organs and hormonal glands... heart, kidneys and adrenal glands etc) cystitis, prostatitis, corona virus, diarrhea, skin allergies, ear infections – all commonly seen in animals.

# “Activated Charcoal” Health Benefits

Why “activated Charcoal powder”?

Health Benefits The American Journal of Gastroenterology published a study reporting a scientific claim that activated charcoal can reduce the build-up of **nitrogen waste** in the body; e.g. ..UREA levels (toxic waste) from kidneys. Research studies have also shown that **activated charcoal decreases the toxic load on the body by over 60% with daily use.** This is due to its ability to bind and grab up chlorine, pesticides and herbicides, bacteria, viruses, yeast, parasites, toxic chemicals and endotoxic metabolites.

Endotoxins These are substances that are produced within our body. This would include toxins produced by our gut bacteria, molecules formed by incomplete liver conjugation and ammonia which can arise due to inadequate kidney filtration.

## **Charcoal (activated) (powder or use powder from capsules)**

Natural charcoal for allergies, nausea, ulcers, vomiting, bloat, diarrhea, acid reflux, seizures.

Intestinal disorders, Poisons and drug overdoses . **Pulls out 4,000 toxins a day.**

Or if not eating oral syringe side of mouth. Can also use in conjunction - if needed the **Slippery Elm powder** mixture **Colostrum powder** given orally - a oral dose with a syringe every 10 minutes until settled. Repeat casually until 100% well again.

## SUGGESTION

to assist your pet with – whether acute or chronic kidney weakness. Starting adding activated charcoal to your pets daily meals. e.g. get the "activated charcoal" in powder form.

**FELINE, TOY DOG to SMALL SPECIES:** Add 5 drops of the RenoAid 19-1 formula, and 1 teaspoon into a cup of filtered water in a jar with lid, shake before each use. Pour 1-2 tablespoon in meals or/and milk drink. (or build up to a tablespoon each meal or just add once a day to meals).

**SMALL to MED DOG:** Add 5 drops of the RenoAid 19-1 formula, and 2 teaspoons of AC to a cup of filtered water, stir well, then each day add one tablespoon in meals or milk drink. (or build up to a tablespoon each meal or just add once a day to meals).

**LARGE DOG:** Add 5 drops of the RenoAid 19-1 formula and double the amount of powder again into a cup of water.

# What else can I do?

## Fix the Gut Flora and Gastro-Intestinal Digestion system

Here is the BELOW supplement I like to use for myself and my pet's, with great success and healing the gut.

### **NZ Colostrum Powder or chewable tablets**

Colostrumhealth 100% pure Colostrum

<http://www.colostrum.gen.nz/> Order on-line.

**Feline - Toy dog:** Add a pinch of powder or each into every meal given.

Double the amount for larger pets Or give the yummy chewable tablets twice a day.

**and**

### **Enzyme Probiotic Complex ( By AMERICAN HEALTH)**

#### **Suggested Guide Animal Dosage**

Canine: add the powders from the 2-3 capsules, and mix well into meals.

After a couple of weeks increase to ½ cap daily.

Feline, toy dog, infant farm animal or other small animals: add the powders from one two capsules and mix well into meals.

It takes 2 months to fully restore "gut flora" along with aiding better digestion absorption - helping gastro-intestinal health and digestion.

# Colostrum

**help** support those who have autoimmune diseases in several ways.

First by healing the intestinal lining, second by reducing inflammation, and third, by slowing an overactive immune system response. People and animals with autoimmune diseases are among the first to notice the benefits of colostrum.

**NOTE: Cancer, diabetes, IBS, leaky gut, colitis, canine and feline virus, arthritis, lupus etc are just some of the conditions that are autoimmune conditions.** Colostrum contains many substances that play a critical role in the healing of leaky gut syndrome. Its many beneficial factors focus their efforts in this area of the body where an overwhelming majority of diseases and infections gain entrance. One of the first things colostrum does is repair damaged tissue and seal the mucus layer of the intestines, making it impermeable to viruses, bacteria, fungi, toxins and parasites. Some of the growth factors contained in colostrum have an anti-inflammatory effect which is a big factor in the initial healing of leaky gut syndrome. Without a leaky gut many other conditions can simultaneously and positively be affected. This in turn greatly reduces the toxic load on the body and increases nutrient uptake. As this intestinal lining is healed, food allergies are reduced and often disappear entirely. The immune response is enhanced and the first line of defense in the bowel is returned back to a more normal function. The enhanced nutrient uptake supports other vital tissues and organs. This is why organ function improves and energy levels rise. Because the proper function of the gastrointestinal track is so vitally important to so many processes in the body, **the healing of leaky gut syndrome is monumental.** Colostrum is highly recognized for its effects in this area. Especially for **rescue cats or kittens and dogs** that may have missed out of health mum cats milk (containing colostrums). Feral to semi-feral, homeless rescued cats, kittens.

**Colostrum** is a great way to help rid the body of iron that is not being controlled by bioavailable copper. Lactoferrin binds iron 250 times stronger than Ferroportin making the iron unavailable for pathogens to feed on. Calves, when born, have a great chance to live ONLY if they get their colostrum. When colostrum is withheld, that number drops considerably. Same goes for human 'calves'. DE, IP6 (Rice Bran) and/or colostrum are very beneficial for removing the iron in the gut.

## Iron in the gut is the reason for all the IBS, Colitis, Crohns etc...

**Itis** means **inflammation** and it stand for "It's The Iron, Seakers"

**Itis** is **inflammation** caused by IRON not controlled by Cu/Cp (copper)

**Fixing the liver as well.**

Article on Dysregulation of iron and copper homeostasis in nonalcoholic **fatty liver**  
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4342600/>

# Magnesium

Suggested Guide Animal Dosage

Magnesium (mineral)

Cat: **plus add a “pinch” of magnesium (mineral) powder.**

Dog: **plus a ½ a teaspoon of magnesium supplement. (powder from cap or crush tablet)** Example: **Magnesium Glycinate** powder is a chelated form of magnesium that tends to provide one of the highest levels of absorption and bioavailability and is typically considered ideal for those who are trying to correct a deficiency.

**This form of magnesium WILL NOT CAUSE DIARRHEA** if taking a larger therapeutic amount. OR **Magnesium liquid (ReMag magnesium solution)**, is the most absorbable form and has no additives to this solution. 1 teaspoon = 300mg of magnesium. \*HAMPL sells this Magnesium. **This form of magnesium WILL NOT CAUSE DIARRHEA** if taking a larger therapeutic amount. Other liquid mags often have other preservatives in them, which I would avoid.

## Slippery Elm Powder

Can ALSO buy this from health food store and most drug stores (chemist)

Slippery Elm Powder (**ulmus fulva**) also known as Red Elm, Moose Elm or Indian Elm, is a small tree native to North America. It has been a part of traditional herbal medicine for over 100 years, and was used by both Native Americans and early settlers as a survival food during lean times.

### Suggested Guide Animal Dosage

#### SMALL ANIMALS – PETS:

Add a little boiled hot water from kettle to make a smooth paste. (mix well) Then add ¼ or ½ cup of filtered room temp water, stir again.

Dosage guide:

Cat or toy dog: using 1 teaspoon (1-2ML) of mixture and add mix well into food.

Small to Med dog: using 2-3 TBS of mixture and add mix well into food.

Med to Large dog or animal: using ¼ CUP of mixture and add mix well into food.

Or if scouring is bad or in pain with ulcers etc ORAL SYRINGE THREE TIMES A DAY – BEFORE OFFERING ANY FOOD. Stop or reduce frequencies. Then stop once back to normal.

**STRESS – SHOCK** Apply 4-5 drops on body –the HAMPL Shock 115 drops and/or apply 4-5 drops on body of the BACH FLOWERS Rescue remedy for stress. Can also mix in a few drops to the slippery elm mix as well and in water bowl.

#### **Adding HERBAL ANTIBIOTICS and SUPPLEMENTS to the Slippery Elm Mix**

E.G minerals (magnesium) 10 drops, powder from 2 capsules of the Enzyme Probiotic Complex and 1/4 teaspoon of Colostrum powder.

HAMPL **Infection Fighter 71** drops (herbal antibiotic) or other herbal formulas indicated, fine if animal or pet is already on antibiotic drugs at the same time.

## Slippery Elm Powder

Horse, Foal, Sour, Calf, Lamb, Goat, Joey (infant kangaroo)

**Infant Farm Animals** : you will need to oral syringe. ORAL syringe with an large syringe a couple of tablespoons of mix every half an hour until conditions improves, then either stop or reduce frequencies. Then stop once back to normal.

### **STRESS – SHOCK**

Apply 4-5 drops on body –the HAMPL Shock 115 drops and/or apply 4-5 drops on body of the BACH FLOWERS Rescue remedy for stress. Can also mix in a few drops to the slippery elm mix as well and in water trough or bowl.

**Using the Bach flowers rescue remedy as a prevention if a great idea for all farm animals.**

**Can spray on nose or 4-5 drops on body frequently as needed. Up to 6 times a day if needed.**

**You will find the following day animal is acting and looking better.**

## Adding HERBAL ANTIBIOTICS and SUPPLEMENTS to the Slippery Elm Mix, minerals, probiotics, colostrum etc

E.G minerals (magnesium) 10 drops, powder from 2 capsules of the Enzyme Probiotic Complex and 1 teasppon of Colostrum powder.

HAMPL Infection Fighter 71 drops (herbal antibiotic) or other herbal formulas indicated, fine if animal or pet is already on antibiotic drugs at the same time.

# Clostridium Perfringens Infection in your dog?

Clostridium perfringens is bacteria that can cause chronic diarrhea in dogs. It thrives in rotting vegetation, uncooked or undercooked meats, and underwater sediment. Many dogs already have this bacteria in their intestinal tracts, but show no symptoms, because some strains of the bacteria are more toxic than others. Learn more about how clostridium perfringens can cause chronic diarrhea in dogs.

## **Clostridium Perfringens and How It Infects Dogs**

Clostridium perfringens is a spore-producing bacteria that can cause chronic diarrhea if it infects your dog's intestinal tract. About 80% of dogs who become infected with this intestinal bacteria show no symptoms, and many of those who do develop symptoms develop only mild symptoms. It can, however, lead to serious, life-threatening diarrhea in some cases.

Dogs usually contract clostridium perfringens from eating garbage or rotten food, since it lives mostly in decaying meats and vegetable matter. Dogs may also be exposed to the bacteria when kept in close quarters with other dogs, such as at a boarding kennel. Often, dogs may carry the bacteria in their intestines for months or years before another illness, or a period of extreme emotional stress, weakens their immune system and leads to more serious infection.

## **Symptoms of Clostridium Perfringens Infection**

If your dog is infected with clostridium perfringens, his only symptom may be chronic diarrhea or diarrhea that lasts longer than two weeks. Diarrhea may be watery and may contain mucus or blood. Your dog may produce a very small amount of stool in relation to the amount of blood, water and mucus secreted; he may strain to move his bowels and may move his bowels more often. Dogs infected with clostridium perfringens often experience some degree of discomfort in the abdomen and may pass an excessive amount of intestinal gas. Vomiting and fever may occur, especially in more severe cases.
