

Title :	AN 127	Colloidal Silver	No. of Pages : 2
Doc Name :	CAN APPLY NEAT, FOR EXTERNAL USE.		Related Products :
Last Updated: 12/01/2017	MUST ALWAYS BE DILUTED WHEN GIVING INTERNALLY.		

Colloidal Silver For All Species

For common eye problems, soak cotton pad and use to wipe eyes, use separate pad for each eye. If your animal is prone to eye infections, bathe them everyday as a prevention.

For bacterial ear infections, soak cotton pad and wipe inside and outside of the ears. A few drops can be dropped into the ears. Mix a few drops into animal shampoo to keep their coats free from parasites. For cats, brush their coats upwards and spray into the fur and rub in. Keeps the coat free from parasites.

Spray directly onto any wounds, cuts or scratches. Repeat every few hours for the first day then twice a day until healed. The antiseptic power of colloidal silver will aid with the healing but most importantly will stop the wound becoming infected.

Spray directly onto tick and flea bites, stops infection and aids the healing process.

Put a few drops into their drinking water to keep infections at bay and may help to maintain a healthy immune system.

Spray pet bedding and let it dry. If washing the bedding add a tablespoon of silver to the last rinse.

Dilution Rate is 1 to 1 Ratio, 1 part silver to 1 part [filtered water](#)

Colloidal Silver is non toxic and beneficial for Horses, Livestock, Dogs, Cats, Poultry, Birds, Reptiles, and Mammals as all have a multi cell form. Bacterias, fungi, viruses, worms or any disease carrying pathogen has a one celled organism.

General Information

Horses - Colloidal Silver is already being used by many vets to treat a variety of horse ailments with great success giving quick healing results – pink eye, conjunctivitis, external open wounds, internal and external ulcers.

Beef and Dairy Farming Industry - many trials are taking place using Silver in cattle feed.

Greyhound Kennels – used as a spray in the kennels to stop any cross infections occurring between the dogs.

Race, Polo and Eventing Horse Stables - used as a spray in the stables to stop any cross infections occurring between the horses.

Some uses of Colloidal Silver:

- Spray in shoes, between toes or between legs to stop most skin itch, athlete's foot and fungus infections.
- Apply to dandruff, psoriasis and skin rashes.
- Add to bath water, gargles, nasal sprays.
- Cuts healing time dramatically with colds, flu, pneumonia, staph, strep, respiratory infections.
- Skin itch, eye and ear infections.
- Put a few drops on a band-aid and put on warts and moles. Also on bandages to reduce healing time.
- Neutralises tooth decay and bad breath. Use to soak dentures.
- Treat toothaches, mouth sores and bacterial irritations.
- Excellent for nappies and nappy rash.
- Add to rinse water when washing invalid pillowcases, sheets, towels and bedclothes.
- Spray pet bedding and let dry.
- Add when canning, preserving or bottling.
- Spray chopping boards and kitchen sponges to eliminate E Coli and Salmonella bacteria to prevent food poisoning, gastrointestinal inflammation and genital tract infections.
- Add to water based paints or wall paper paste to prevent mildew.
- Mix in birdbaths, pet water (1 tspn in filtered water for pets), and flower vases.
- Eliminate unwanted organisms in planter soils and hydroponic systems.
- Add to dishwasher, cleaning and mopping solutions.
- Add to suspect drinking water when traveling or camping.
- Water mixed with a little colloidal silver is a great digestive aid especially if taken with meals.
- Colloid sprayed burns heal rapidly without scarring.

Colloidal Silver was used and proven to be effective against hundreds of disease-causing bacterium by the 1940s. Its action as a broad spectrum antibiotic has never been matched by the modern pharmaceuticals in that it produces no drug resistance whatsoever.

Internal Animal Dosages:

Dose: Approx. 1ml 2 - 3 times daily (half that for small animals)
(ALWAYS diluted in some filtered water or goats milk to give to drink or syringe orally)

Birds - stir in 1 teaspoon of CS in water dish once a week. If bird/s not happy with taste reduce the amount and work up to more if possible.

SICK / DISEASE

If animal/bird is unwell or has a disease of some sort, we highly recommend also adding to water or meals several drops of **Mineral supplement** (ReLyte Mineral Solution) order from internet in the USA. Or alternatively add a pinch of **Celtic salt grains** and dissolve in a tablespoon of water. Salt has all the natural minerals needed for boosting and maintains health for pets and humans.
