NATUROPATHIC ADVICE

In conjunction with using homeopathic and herbal treatments we highly recommend a home prepared (chemical, wheat, corn, free)
Omitting all drugs (toxins) that cause liver and ill health.

Diet & Nutrition Daily Requirements

See dog and cat diet HAMPL HEALTH BOOKLET

VITAMINS needed would be:

1. Magnesium (mineral supplement)

Signs of Magnesium Deficiency

The classic physical signs of low magnesium are:

Neurological:

Behavioral disturbances
Irritability and anxiety
Lethargy
Impaired memory and cognitive function
Anorexia or loss of appetite
Nausea and vomiting
Seizures

Muscular:

Weakness
Muscle spasms (tetany)
Tics
Muscle cramps
Hyperactive reflexes
Impaired muscle coordination (ataxia)
Tremors
Involuntary eye movements and vertigo
Difficulty swallowing

Metabolic:

Increased intracellular calcium
Hyperglycemia
Calcium deficiency
Potassium deficiency

Cardiovascular:

Irregular or rapid heartbeat
Coronary spasms

Magnesium (*mineral supplement*)

Magnesium Glycinate powder is a chelated form of magnesium that tends to provide the highest levels of absorption and bioavailability and is typically considered ideal for those who are trying to correct a deficiency. DOSAGE: **Toy dog or Cat:** *approx. ¼ to ½ teaspoon of Magnesium Glycinate powders.*

Small to Med to large dogs and horse. *1 flat teaspoon. More if needed initially for the first 4 days to get the therapeutic effect straight away into meals. (do not use other types of magnesium's as there are several other types).*

OR

I really like liquid Magnesium called **ReMag Magnesium Solution 240ml**. Buy from doctors website on line. Add 5 drops to every meal given for cat or small dog. ¼ cap to med dog ½ cap to larger dog. Double the amount after 2 weeks. Add a pinch of Cream of Tartar as well for **potassium support**.

2. Manganese (*trace mineral supplement*)

Signs of Manganese Deficiency has been linked to:

The classic physical signs of low Manganese are:

Infertility, male impotence

Loss of hearing,

Dizziness and fainting

Stunted growth

Ataxia

Weak tendons and ligaments

Confusion

Hypertension (high blood pressure)

Sprains / strains

Fatigue / Weakness

Cognitive dysfunction

Irritability nervousness

Osteoporosis

Arthritis

Manganese Chloride

Apparently Manganese Chloride is the best type to get and use.

DOSAGE: **Med to Large Dog.** E.g. give 25mg every half an hour for four repeats.

Toy dog or Cat: add 5mg (a pinch) Repeat again following day. As we need to give a therapeutic amount to get faster response and result. Reduce after a week or add more if no results are being seen. Once improved wellbeing for a month, reduce to half doses on going. Best not with food

Plus **Omega Oils 3**

3. Essential Fatty Acid OILS

See HAMPLS HEALTH Booklet on Oils to use.

4. Vitamin C

See HAMPLS HEALTH Booklet on Oils to use.

(if you did not receive a booklet please contact the office)

5. Vitamin B6 (P5P) 33.mg capsules or higher. Add powder to meals twice daily.

ALL "SUPPLEMENTS" ARE AVIALABLE FROM HEALTH FOOD STORES Or order from internet. I like iherb.com
